This project/contract is funded in whole or in part by funds made available through the American Recovery and Reinvestment Act.
Project Purpose

Phase I Study Conversion of Sprague Avenue Corridor to an energy efficient major multimodal transportation facility supporting transit oriented development.
Project Partners

- Spokane County
- Spokane Transit Authority
- Spokane Regional Transportation
- Spokane Regional Health District
- Downtown Spokane Partnership
- University District Development Alliance
- East Central Neighborhood
- East Spokane Business Association
- Washington State
Project Elements

- Land Use
- Transit
- Multimodal Transportation
- Public Participation
- Energy Efficiency
Timeline

• GTEC Outreach Through March 2012
  – Focus on universities
• Project Initiation April – May 2010
  Develop team, public participation plan and RFQ
• Phase I Study Aug 2010 – Feb 2012
  Conversion of Sprague Avenue Corridor to major multi-modal transportation facility supporting transit oriented development.
Phase I Elements & Timeline

• Synthesize current studies, conditions, development capacity. **November 2010**

• Incorporate partner study findings; assess transit oriented development and multimodal infrastructure requirements. **March 2011**

• Develop Electric Vehicle Charging (EVC) Strategy. **May 2011**

• Green infrastructure study, recommendations, priorities. **June 2011**

• Draft Recommended Transit Strategy for Sprague Corridor. **August 2011**
Phase I Elements Timeline

- Draft alternative roadway configuration study. September 2011
- Develop study and draft recommendations for land use and multimodal alternatives. November 2011
- Develop Design Elements Strategy for Sprague Corridor. February 2012
- Draft updates for Comprehensive Plan. February 2012
