The University District Community Visioning Open House (September 2016)

START
Welcome to The University District's online Community Visioning Open House. This interactive tool is intended to supplement the in-person Open House taking place on Tuesday, September 6 from 4:00pm-6:00pm at the office of Stay Alfred (123 East Sprague, Spokane, WA 99202).

Whether you attend/attended that session or not, we welcome your feedback on the design boards on the following pages.

By way of background, and since the completion of the original University District master plan in 2004, many significant new developments have taken place within The University District. The University District Development Association (UDDA) has served to bring a collective voice to the development of these advancements throughout the years.

From that time until now, over $740M in public, private and institutional investments have been made within The University District boundaries. Today, the ongoing expansion of medical school programs and the full funding of The University District Gateway Bridge— as well as the City’s investment in Martin Luther King Way and East Sprague upgrades—amplify the opportunities for continued community planning and collaboration.

We invite you to provide feedback on the following high-level design elements and to participate in expanded community visioning of The University District going forward.

Please click through the next screens to see a series of visioning images. Take notes regarding your likes, dislikes, other ideas, questions, recommendations, etc. You will be able to rate some images and record comments on subsequent screens.

Your ideas and input will be synthesized into a collective vision of what is possible and revealed at the 2016 University District Magazine release party in October.
The first set of images provide examples of City Life. Elements such as architectural character, activities and culture are depicted. Use the next screen to tell us what you think of these images.

1 City Life images rating - using the scale below (three stars being most favored), please provide your personal rating of the vibrancy and general livability you see in these images.

1 2 3

2 City Life - please reflect on the qualities of city life you see in the images below and relate them to how you would like to see Spokane transform.
This next set of images provides examples of urban **Infrastructure**, such as park spaces, living buildings, eco-districts, etc. Click to the next screen to rate these examples.
3 **Infrastructure** images rating - please indicate your degree of interest in the infrastructure examples depicted.

1 2 3

4 **Infrastructure** - please enter your comments below on desired infrastructure features.
Nature in the urban landscape is featured in these examples, incorporating spaces like blue-greenways, urban agriculture and parks. Are these options appealing to you?
5 Nature images rating - please share the degree to which you think nature features are important in urban life.

1 2 3

6 Nature - please tell us more about your preferences for nature elements in the city.
Transportation is the focus of these pictures (arterial and transit, neighborhood, block). Do these images relate to what you would want in your mobile life?
7 Transportation features rating - please rate the transportation features presented.

1 2 3

8 Transportation - please tell us more about what you want mobility-wise in The University District.
The next two boards show Existing Right of Way and Inspirational Right of Way options on University District streets. Below are existing conditions. Click to the next page to see Inspirational alternatives.
What do you think of these Inspirational Right of Way alternatives?
9 Right of Way - please enter your comments below regarding the existing and/or inspirational right of way images.

10 Gateway Bridge Images (for those of you who attended the Open House and saw these boards) - Please share your thoughts on the Gateway Bridge images.

Thank you for your input on the following wrap up questions.
11 What is your greatest hope and your greatest concern as The University District develops?

12 What would you like Spokane to look like in 2035? In 2065?

13 What would you like to experience in a five minute walk through The University District whether there to live, learn, work or play?

14 Both nationally and globally, how can The University District develop to help make Spokane a highly unique and desirable urban community?

15 Any additional feedback on The University District Visioning Open House?

16 Tell us more about you
